---

OK, in the tradition of the Complete Autobot Army (A to Z) post I made a while back I give you the Complete Decepticon Army (A to Z) PLUS an organizational chart of ALL US Decepticon toys broken down by rank and function, as taken from the Tech-specs. (why the specs? because they're they're the only Official and Universal listing of military ranks available.) I've allways been interested in how the TF Armies were organized. This is my attempt at figuring it out. I added the plus because this time I've included all available UK exclusive Cons as well (ie: all the specs for them I could find on the web, which is MOST, but sadly not all) So here we go, the COMPLETE US (and near-complete UK) Decepticon Army, from A to Z! :) Let me know what you think, especially about the way I broke them down and organized the army. :) (oh, and cross your fingers Deja News doesn't mangle the format, or I'll have to do some rearanging and post again ;) KEY:
